S. No	Farming system/enterprise
1	Rice based farming system (Rice-Animal husbandry, Vegetables, Fishery)
2	Rice based farming system (Rice- Vegetables)

**2.2. Description of Agro-climatic Zone & major agro ecological situations (based on soil and topography)**

**a) Soil type**

Sl. No.	Agro-climatic Zone	Characteristics
1	Rice –Pulses sub zone	Annual precipitation 1400-1650 mm
2	Rice –Rabi sorghumsub zone	1250-1400 mm
3	Multi crop rabi dominated sub zone	1250-1300 mm

**b)Topography**

S. No.	Agro ecological situation	Characteristics
1	Rice –Pulses sub zone	Annual precipitation 1400-1650 mm
2	Rice –Rabi sorghumsub zone	1250-1400 mm
3	Multi crop rabi dominated sub zone	1250-1300 mm

**2.3 Soil Types**

S. No.	Soil type	Characteristics	Area in ha
1	Entisols (Shallow soil)	Gray in colour, Depth - 7.5 CM, pH- 7-8, well-drained, WHC less, Very low in org. C, avail. N & P & medium in avail. K. Suitable for forest plant like Neem, Subabul, Eucalyptus, Bamboo.	3.62 lakh ha.
2	Alfisols (Reddish brown)	pH-6.5-7.5, WHC medium, low in available nutrient. Suitable for rice, teak, bamboo, and eucalyptus etc.	3.37 lakh ha.
3	Inceptisols (Medium deep black)	Depth-25-5 cm, Depth- 7.5-25 cm; pH- 7.5-8.5, well drained, WHC less, Low in organic C, Available N, & P. Available K is very high. Suitable for pulses & oilseeds	2.51 lakh ha.

## 2.7. Details of Operational area / Villages

Taluka	Name of the block	Name of the village	Major crops & enterprises	Major problem identified	Identified Thrust Areas
Sakoli	Sakoli	Parastola	Paddy, Pigeonpea, Chickpea, Sesamum, Linseed, Mustard, Lathyrus, Dairy ,Poultry, Horticultural crop	Low productivity	Integrated Nutrient Management in all crops, Integrated Pest Management in all crops, Crop diversification, Agri entrepreneurship development, Multi resistant varieties of crops, Lack of knowledge about new technologies
Sakoli	Sakoli	Bampewada	Paddy, Chickpea, Linseed, Dairy ,Poultry, Horticultural crop	Low productivity	
Sakoli	Sakoli	Ekodi	Paddy, Chickpea, Dairy ,Poultry, Horticultural crop	Low productivity	
Sakoli	Sakoli	Bodara	Chickpea, Dairy	Low productivity	

## 2.8. Discipline-wise Priority thrust areas:

Crop/Enterprise	Thrust area
<b>Agronomy/Entomology</b>	Integrated Nutrient Management in all crops
	Integrated Pest Management in all crops
	Crop diversification
	Agri entrepreneurship development
	Lack of irrigation water
	Multi resistant varieties of crops
	Poor economic condition
	Lack of knowledge about new technologies
	Need implements for rabi cultivation
	More pest infestation in kharif paddy
<b>Livestock&amp; Dairy</b>	Needs upgradation of local breeds of cow, buffalo, goat, etc.
	Need Improvement in milk productivity of milch animals.
	Improvement in health of milch animal.
	Need to increase area under forage crop.
	Commercialization of dairy enterprise.
	Reduction in cost of feed through enrichment of poor quality roughages and preparation of own feed mixed.
	Popularization of deworming and vaccination of animal
<b>Horticulture</b>	Improvement in productivity of horticultural crops
	Multiplication of disease free planting material.
	Knowledge about package of practices for vegetable, fruit and flower crops
	Improvement of post harvest handling of horticultural crops
<b>Mechanization</b>	To mechanize seed bed preparation, nursery preparation, Puddling , transplanting, Sowing,intercultural and harvesting operation in paddy cultivation
	To mechanize seed bed preparation, sowing/planting and harvesting operation in rabi crop cultivation
<b>Soil water conservation</b>	To introduce the soil and water conservation measures for storage and utilization of rain water
	To introduce low cost technology for Water Recycling
<b>Drudgery reduction</b>	Promotion of drudgery reducing farm implements for women.
	Entrepreneurship development in fruit and vegetable processing and mushroom cultivation
<b>Extension Education</b>	Organisation of farmers group and their capacity building
	Promotion of micro financing, linkages with banks
	Market intelligence

	Promotion of agricultural insurance and subsidiary occupations
	TOT for Knowledge dissemination and boosting rate of adoption of improved technology
	Establishment, strengthening and utilization of linkages and Use of ICT
	To introduce the micro irrigation methods (drip/sprinkler irrigation methods)
<b>Family Nutrition</b>	Nutrition education and food security of rural families

#### Technical Feedback on the demonstrated technologies

S. No	Feed Back
1	Incidence of pests was found minimum in recommended technology when applied at ETL than farmer practice
2	use of improved variety gave higher yield than local varieties
3	The leaves yield of coriander variety Pant Haritama was higher than Local varieties and quality of leaves was also good in taste.
4	In case of Brinjal variety AKLB-9, the variety is excellent in taste and having good marketable qualities.
5	Okra variety PDKV-Pragati is good in terms of yield and quality.
6	Rice varieties recommended for the district yields more, yield increases due to application of fertilizers on soil test basis
7	Due to use of Use of improved variety JAKI -9218 ,seed treatment and insecticide yields were higher
8	NL- 260 yields more
9	NL- 260 yields more in minimum cultivation as compare to realey sowing

#### Farmers' reactions on specific technologies

S. No	Feed Back
1	In paddy transplanting done by line sowing at recommended spacing gave more yield than paddy sown by traditional method
2	In Chickpea yield was obtained more when sowing done by recommended spacing than broadcasting method
3	The Pant Haritama variety was good for leaves as well as seed production. The taste of leaves was quite good for eating.
4	In case of Brinjal variety AKLB-9, the variety is good for yield as well as market.
5	PDKV-Pragati variety is good for yield and market.
6	Rice varieties recommended for the district yields more, yield increases due to application of fertilizers on soil test basis
7	Due to use of Use of improved variety JAKI -9218 ,seed treatment and insecticide yields were higher
8	NL- 260 yields more

**1) Extension Research (2022-23)**

**TRAINING NEED OF BHANDARA DISTRICT FARMERS**

Training plays an important role in the advancement of human performance in a given situation. Krishi Vigyan Kendra, Sakoli conduct a variety of trainings for the benefits of farmers and rural youth in Bhandara district. KVK training programme starts with identification of training needs, the most important steps in organization of any training programme. The present study on training needs analysis of the farmers and rural youths conducted by KVK, Sakoli to identify their training needs and interests during year 2022-23.

## Objectives of the study:-

The objectives of the study were to identify the training need of Bhandara district farmers.

## Methodology:-

- 1) **Selection of Taluka and Villages** - For the study all seven blocks i.e. Bhandara, Sakoli, Mohadi, Tumsar, Lakhani, Lakhandur, Pauni of Bhandara district were selected, total 12 villages based on production potential of the different farming system were selected for the present study.
- 1) **Selection of farmers as respondents** – On consultation with the extension functionaries of state agricultural department, local leaders as well as KVK staff, a list of farmers representing different categories were selected for each village. From the individual list of farmers from selected village, ten farmer respondents were randomly selected. Thus, a total of 120 farmer respondents will be finally selected for data collection

## Collection and analysis of data

The interview schedule was constructed in accordance with the study objectives and it was used for data collection. The respondents were contacted either at farm or home and the information in the interview schedule was collected. The information obtained from 120 farmers was taken for analysis. The information analysis with suitable statistical tools.

The farmers responses were collected in a 3 point continuum scale as Very important (VI), Important (I) and Not Important (NI) by assigning scores 3, 2 and 1 respectively. the results were calculated as weighted score for each of the thrust area identified for the training.

Weighted score (WS) = (No. of VI x 3) + (No. of I x 2) + (No. of NI x 1)

-----  
Total no. of VI+I+NI

## Results and discussion

The training needs of the farmers are presented in the form of weighted scores in the tables 1-9. Weighted scores were ranked within each discipline and the ranking were identified as training needs of the farmers of the district.

#### 5.2. Indicate the methodology for identifying OFTs/FLDs

##### For OFT:

- i) PRA
- ii) Problem identified from Matrix
- iii) Field level observations
- iv) Farmer group discussions
- v) Others if any

##### For FLD:

- i) New variety/technology
- ii) Poor yield at farmers level
- iii) Existing cropping system
- iv) Others if any

The PRA and other survey methods were implemented in the adopted village and other survey methods like use interview schedules, questionnaire, secondary data, RRA and discussions with farmers group, following conclusions has been drawn:

**SWOT analysis of Parastola village:** (S- Strength, W- Weaknesses, O- Opportunity, T- Threats)

##### Strength:

1. Availability of organic waste
2. Greater participation of farmers in social activity
3. Positive attitude towards livestock business
4. Soil best suited for agronomical and horticultural crops
5. Village nearest to National Highway-6.

##### Weaknesses:

1. Monoculture cropping pattern of village.
2. Use of local varieties
3. Less knowledge about IPM, INM.
4. Less use of bio fertilizers and seed treatment.
5. Imbalanced fertilizer and pesticides use
6. Lack of irrigation water
7. Lack of scientific knowledge about care and management of livestock
8. Lack of Knowledge & availability about farm machinery/ Implement
9. Less risk bearing ability

**Opportunities:**

1. Scope for enhancing diversified farming system approach.
2. Use of high yielding varieties.
3. Scope for increasing area under pulses, oilseeds and vegetables crops.
4. Create awareness about balanced use of fertilizer and pesticides.
5. Introduction of crossbred animals and improved fodder crop variety.
6. Scope for increasing milk production and poultry.
7. Use of improved Implements for Enhancing work efficiency and saving cost.
8. Scope for developing agro base enterprises, value addition.
9. Scope for entrepreneurship development.

**Threats:**

1. Uncertainty and long dry spell of rainfall.
2. Heavy losses due to wild animals.
3. Unavailability of post-harvest technologies viz. storage facility etc.
4. Discontinuity in electricity.

**POIN Analysis:**

The PRA and other survey methods were implemented in the Parastola village and other survey methods like use interview schedules, questionnaire, secondary data, RRA and discussions with farmers' core group, following POIN analysis has been drawn:

Sr	Problems	Opportunities	Issues	Needs
1	Monocropping	Introduction of New crop, diversified cropping system	Low yield, low productivity, Unawareness about cropping system	Training Demonstration Exposure visit
2	Lack of Knowledge about scientific technology about crop production	Upliftment of scientific Technology	Use of local varieties, traditional farming system, no proper tillage operation	Training Demonstration Popular articles
3	Lack of knowledge about IPM	Introduction IPM package	Low yield, more expenditure on plant protection measures, minimum pest control	Training Demonstration Meeting
4	Less use of biofertilizers	Introduction of bio fertilizers in Crops for treatment.	Occurrence of pest and disease, low yield, poor quality	Demonstration Training Meeting
5	Lack of Knowledge & availability about farm machinery/ Implement	Enhancing work efficiency and saving cost.	Traditional tools/ implements and techniques use for farming	Demonstration Exposure visit Training Linkages
6	Minimum use of quality fodder for milch animal	Introduction of improved variety of fodder crop	Traditional feeding approach, open grazing, low milk yield, low fat percentage	Demonstration Training
7	Unemployment (Seasonal) Unutilized lean period	Seasonal employment for post-harvest processing and value addition processing	Resource management Secondary agriculture Custom Hiring	Vocational trainings, Linkages with market channel
05	Weak linkages of farmers with different organization	Enhancing linkages introducing cluster farming approach	Lack of scientific information sources, less initiative	Training Exposure visit Promotion of SHG
08	Lack of scientific knowledge and skill about value addition	Scope for developing skill among farmers, SHG's	No risk bearing ability, poor economic status	Training Demonstration Exposure visit
09	Low SWC and degraded soil health	RWH, In-situ moisture conservation	Water harvesting, INM, Increment in soil Health	Trainings, Soil Testing
10	Less participation of farm woman in decision making	Increasing participation of farm woman in decision making	Less education, Male dominant society	Formation of SHG

**Major problems identified:**

1. Low productivity
2. No proper crop rotation/ mono cropping system
3. Use of local crops varieties.
4. Improper use of insecticide, pesticide
5. Lack of knowledge about INM and IPM
6. Labour problem
7. Losses due to wild animals
8. Lack of irrigation water
9. Unawareness and less use of bio fertilizers.
10. Lack of seed treatment.
11. Imbalance use of fertilizer and unawareness about soil testing
12. Lack of Knowledge & use about improved farm Implement
13. Lack of Knowledge about scientific technologies
14. Unavailability of green fodder in summer and Lack of knowledge about improved varieties of green fodder
15. Low milk yield.
16. Unawareness about mineral mixture for milking animal.
17. Lack of scientific knowledge and skill about value addition.
18. Lack of knowledge about green house, polyhouse, use of mulching.
19. Traditional farming approach
20. Poor extension contacts

## Constraints faced by the farmers in sugarcane production (2022-23)

### **Introduction:-**

Sugarcane is important crop in bhandara district. Near about 3053 Ha. Area of sugarcane in bhandara district with productivity 65.30 Ton per hectare. A study on Constraints faced by the farmers in sugarcane production throughout the year (2022-23) in Bhandara district farmers. Present study was designed with following specific objectives

- 1) To study the constraints faced by the farmers in sugarcane production.

### **Methodology:-**

- 1) **Research design used for the study:** - The Experimental research design of the social research was used in the present study as it aimed to ascertaining the Constraints faced by the farmers in sugarcane production throughout the year (2022-23).
- 2) **Selection of respondents** –Major sugarcane production farmers was selected for the study. The adopted Parastola village selected for present study. Sugarcane growing farmers identified in village and 100 farmers selected randomly for present study. Thus 100 farmers were selected for present study.

### **Results and discussion:-**

#### **Title: Impact of organic farming training programmes organized by KVK, Sakoli (2022-23)**

##### **Introduction:-**

Training is one of the important aspects of human resource development. A study on Impact of major training programmes organized by KVK, Sakoli throughout the year (2022-23) in Bhandara district farmers. KVK, Sakoli conducted 300 farmers training programmes on organic farming under *Paramparagat Krushi Vikas Yojna* (PKVY), under the sponsorship of Agriculture Technology Management Agency (ATMA) Bhandara, throughout the year 2022-23. It is essential that KVK be able to follow the results of their efforts and understand how the training they imported fit into the complex pattern of socio economic status change in which all farmers participate. Keeping the above facts in view the present study was designed with following specific objectives

- 1) To study the profile of the selected trainees.
- 2) To study training effectiveness.
- 3) To Study the impact of training.

##### **Methodology:-**

- 3) **Research design used for the study:** - The Experimental research design of the social research was used in the present study as it aimed to ascertaining the Impact of major training programmes organized by KVK, Sakoli throughout the year (2022-23).
- 4) **Selection of respondents** –Major training programme conducted by KVK, Sakoli was selected for the study for the study. Total trainees present in the training were selected as respondents. Thus organic farming 300 trainees were selected for present study.

## Results and discussion:-

### 2) Organic farming training under PKVY programme.

**Table 1. Comparative mean scores of pre training and post training knowledge of organic farming trainee's respondents**

S.No	Aspects of Organic farming training under PKVY programme.	Pre training (mean)	Post training (mean)	Difference

In order to ascertain the impact of organic farming training programme on gain in knowledge, the pre and post mean knowledge scores of the recipients of the training was calculated and difference are presented in table 1. Difference between pre and post mean knowledge scores of the recipients of the training confirms that the respondents were able to gain sufficient knowledge at post training programme.

	<b>Total</b>	<b>42</b>	<b>37.17</b>	<b>88.50</b>

It could be observed from table 4 that out of three major dimensions taken for the study, the satisfaction score for Facilities provided was found to be the highest (92.33) followed by communication mode (90.06) and technical competence (85.27). Overall training satisfaction score of the organic farming training programme worked out to be 88.50 which indicated that the respondents of organic farming training more satisfied with respect to the training satisfaction dimensions.

#### **B. Cases of large scale adoption**

(Please furnish detailed information for each case)

#### **C. Details of impact analysis of KVK activities carried out during the reporting period**

**Title: Impact of Dairy Management training programmes organized by KVK, Sakoli (2022-23)**

- 1) To study the profile of the selected trainees.
- 2) To study training effectiveness.
- 3) To Study the impact of training.

#### **Methodology:-**

- 5) **Research design used for the study:** - The Experimental research design of the social research was used in the present study as it aimed to ascertaining the Impact of major training programmes organized by KVK, Sakoli throughout the year (2022-23).
- 6) **Selection of respondents** – One Major training programme conducted by KVK, Sakoli was selected for the study for the study. Total trainees present in the training were selected as respondents. Thus Dairy Management 60 trainees were selected for present study.

#### **Results and discussion:-**

##### **3) Dairy Management training**

**Table 1. Comparative mean scores of pre training and post training knowledge of Dairy Management trainee's respondents**

In order to ascertain the impact of dairy Management training programme on gain in knowledge, the pre and post mean knowledge scores of the recipients of the training was calculated and difference are presented in table 1. Difference between pre and post mean knowledge scores of the recipients of the training confirms that the respondents were able to gain sufficient knowledge at post training programme.

**Table 2. Change in knowledge in Dairy Management training respondents**

Sr.No	Impact dimension	Mean		Percent change
		Pre training	Post training	
1	Knowledge	26.33	44.73	69.88

The data depicted in table 2 show the change in knowledge in dairy Management training respondents, pre training mean score was 26.33 and post training mean score was 44.73 observed, percent change in knowledge was observed 69.88.

**Table 3. Training effectiveness of Dairy Management training**

Sr. No	Indicators	Total obtainable mean score	Obtained mean score	Training effectiveness
1	Topics covered	3	2.60	86.66
2	Utility of topics	3	2.93	97.66
3	Relevance of lectures	3	2.87	95.66
4	Fulfillment of expectation	3	2.80	93.33
5	Practical Orientation	3	2.93	97.66
6	Relevance of study material	3	2.80	93.33
7	Quality of training	3	2.67	89.00
	<b>Total</b>	<b>21</b>	<b>19.60</b>	<b>93.33</b>

It could be observed from table 3 that out of seven major dimensions taken for the study, the effectiveness score for utility of topics and Practical Orientation was found to be the highest (97.66%) followed by Relevance of lectures (95.66%), Fulfillment of expectation and Relevance of study material (93.33%), Quality of training (89.00%) and Topics covered (86.66). Overall training effectiveness score of the dairy management training programme worked out to be 93.33 which indicated that the KVK training can be considered to be effective with respect to the dimensions under study.
