1.8. Details SAC meeting conducted in the year :2025

Date	Name and Designation of Participants	Salient Recommendations	Action taken
05.02.2025	Hon. Dr. S.R. Gadakh, Vice Chancellor, Dr.PDKV, Akola, Hon. Dr. D.B. Undirwade, Directors of Extension Education, Dr.PDKV, Akola,	• Each SMS should publish 12 popular articles in a year • Establish demo unit at KVK	All Action taken

2. DETAILS OF DISTRICT

2.1. Major farming systems/enterprises (based on the analysis made by the KVK)

S. No	Farming system/enterprise
1	Rice based farming system (Rice-Animal husbandry, Vegetables, Fishery)
2	Rice based farming system (Rice- Vegetables)

2.2. Description of Agro-climatic Zone & major agro ecological situations (based on soil and topography)

a) Soil type

Sl. No.	Agro-climatic Zone	Characteristics
1	Rice –Pulses sub zone	Annual precipitation 1400-1650 mm
2	Rice –Rabi sorghumsub zone	1250-1400 mm
3	Multi crop rabi dominated sub zone	1250-1300 mm

b)Topography

S. No.	Agro ecological situation	Characteristics
1	Rice –Pulses sub zone	Annual precipitation 1400-1650 mm
2	Rice –Rabi sorghumsub zone	1250-1400 mm
3	Multi crop rabi dominated sub zone	1250-1300 mm

2.3 Soil Types

S. No.	Soil type	Characteristics	Area in ha
1	Entisols (Shallow soil)	Gray in colour, Depth - 7.5 CM, pH- 7-8, well-drained, WHC less, Very low in org. C, avail. N & P & medium in avail. K. Suitable for forest plant like Neem, Subabhul, Eucalyptus, Bamboo.	3.62 lakh ha.
2	Alfisols (Reddish brown)	pH-6.5-7.5, WHC medium, low in available nutrient. Suitable for rice, teak, bamboo, and eucalyptus etc.	3.37 lakh ha.
3	Inceptisols (Medium deep black)	Depth-25-5 cm, Depth- 7.5-25 cm; pH- 7.5-8.5, well drained, WHC less, Low in organic C, Available N, & P. Available K is very high. Suitable for pulses & oilseeds	2.51 lakh ha.

2.4 Area, Production and Productivity of major crops cultivated in the district (2025)

2.7. Details of Operational area / Villages

Taluka	Name of the block	Name of the village	Major crops & enterprises	Major problem identified	Identified Thrust Areas
Sakoli	Sakoli	Parastola, Papada Khurd, Mundipar, Bampewada, Malutola	Paddy, Pigeonpea, Sesame, Dairy ,Poultry, Horticultural crop	Low productivity	Integrated Nutrient Management in all crops, Integrated Pest Management in all crops, Crop diversification, Agri entrepreneurship development, Multi resistant varieties of crops, Lack of knowledge about new technologies
Tumsar	Tumsar	Sindhpuri, Chulad, Sihora	Safflower, Mustard	Low productivity	

2.8. Discipline-wise Priority thrust areas:2025

Crop/Enterprise	Thrust area
Agronomy/Entomology	Integrated Nutrient Management in all crops
	Integrated Pest & Disease Management in all crops
	Crop diversification
	Agri entrepreneurship development
	Lack of irrigation water
	Multi resistant varieties of crops
	Poor economic condition
	Lack of knowledge about new technologies
	Need implements for rabi cultivation
	More pest infestation in kharif paddy
Livestock& Dairy	Needs upgradation of local breeds of cow, buffalo, goat, etc.
	Need Improvement in milk productivity of milch animals.
	Improvement in health of milch animal.
	Need to increase area under forage crop.
	Commercialization of dairy enterprise.
	Reduction in cost of feed through enrichment of poor quality roughages and preparation of own feed mixture.
	Popularization of deworming and vaccination of animal
Horticulture	Improvement in productivity of horticultural crops
	Multiplication of disease free planting material.
	Knowledge about package of practices for vegetable, fruit and flower crops

	Improvement of post harvest handling of horticultural crops
Mechanization	To mechanize seed bed preparation, nursery preparation, Paddling , transplanting, Sowing, intercultural and harvesting operation in paddy cultivation To mechanize seed bed preparation, sowing/planting and harvesting operation in rabi crop cultivation To introduce agriculture Drone in Paddy Area.
Soil water conservation	To introduce the soil and water conservation measures for storage and utilization of rain water To introduce low-cost technology for Water Recycling
Drudgery reduction	Promotion of drudgery reducing farm implements for women. Entrepreneurship development in fruit and vegetable processing and mushroom cultivation
Extension Education	Organisation of farmers group and their capacity building
	Promotion of micro financing, linkages with banks
	Market intelligence
	Promotion of agricultural insurance and subsidiary occupations
	TOT for Knowledge dissemination and boosting rate of adoption of improved technology
	Establishment, strengthening and utilization of linkages and Use of ICT
	To introduce the micro irrigation methods (drip/sprinkler irrigation methods)
Family Nutrition	Nutrition education and food security of rural families

3.1. B. Operational areas details during- 2025

S.No.	Major crops & enterprises being practiced in cluster villages	Prioritized problems in these crops/ enterprise	Extent of area (Ha/No.) affected by the problem in the district	Names of Cluster Villages identified for intervention	Intervention (OFT, FLD, Training, extension activity etc.)*
01	Paddy	Mono-cropping & Lack of knowledge about IPM	2370	Papada Kh.,Parastola,	OFT, FLD, Training Programme, Method Demonstration
02	Pigeonpea & Chickpea	Lack of Knowledge about scientific technology about crop production & Lack of knowledge about IPM	425	Papada Kh.,Parastola	OFT, FLD, Training Programme, Method Demonstration
03	Paddy	Farm Mechanization	1750.6	Papada Kh.,Parastola, Bampewada	OFT, FLD Training Programme, Method Demonstration,
04	Safflower	Farm Mechanization	530.4	Papada Kh.,Parastola Safflower, Mustard	OFT, FLD Training Programme, Method Demonstration,
05	Mustard	Farm Mechanization	256.32	Papada Kh.,Parastola Safflower, Mustard	OFT, FLD Training Programme, Method Demonstration,
06	Sesame	Farm Mechanization	198.5	Malutola	OFT, FLD Training Programme, Method Demonstration,
07	Azolla	Low milk production of local cattle	50	Papada Kh.,Parastola	OFT,Training on cultivation of fodder crops
08	Fodder crop	Less area under fodder crop	12	Papada Kh.,Parastola	FLD,Training on cultivation of fodder crops
09	Chilli	Locally grown varieties of Chilli are having • Inferior quality of fruits • Susceptible to pest and diseases. • Having low yield.	250 Ha.	Papada Kh.,Parastola, Vihirgoav	OFT on Introduction of New varieties of Chilli i.e. ArkaMeghana, ArkaKhyati in the district. Training programme on Package of practices in Chilli.
10	Tomato	Locally grown varieties of Tomato are having • Inferior quality of fruits • Susceptible to pest and diseases. • Having low yield.	150 Ha.	Papada Kh.,Parastola, Vihirgoav	OFT on Introduction of New varieties of Tomato i.e. ArkaSweta, ArkaRakshaki Training programme on Package of practices in Tomato

Technical Feedback on the demonstrated technologies

S. No	Feed Back
1	Incidence of pests was found minimum in recommended technology when applied at ETL than farmer practice
2	Disease incidence was found low in recommended technology
3	Use of improved variety gave higher yield than local varieties
4	Tomato variety Arka rakshak is good in terms of yield and quality.
5	Rice varieties recommended for the district yields more, yield increases due to application of fertilizers on soil test basis
6	Due to use of Mustard improved variety TAM 108-1,seed treatment and insecticide yields were higher
7	AKS-207 Safflower yields more

Technological interventions and impact analysis of Model village – Papada Kh.

Selection of technology intervention based on priority thrust areas

Based on the selection of priority thrust areas through PRA we have selected the following areas in which intervention may meet up the prevailing pains of farmers and upscale the farmers income with adding technological **interventions in paddy cultivation, integrated pest and disease management,** cultivation of Vegetables **and fruits crops**, improvement of Backyard Poultry/**Goat** Farming and **Artificial insseminatin (AI) in cow** for up scaling of IFS**. Also focus on cost reduction, Value addition and processing and marketing.**

Situation before and after adoption of village

Agricultural changes after adoption of village

Increased yield in Paddy

	Before	After					
Demonstration of Paddy variety – PDKV Sakshi	12.65	16.71	4.06	110.62	449.11	2300	1032953

Increased yield in Paddy: Encouraged by the success of KVK demonstrations with Paddy variety PDKV Sakshi along with technological interventions like, seed treatment, spacing, Alley ways method of transplanting, RDF and IPDM giving a yield of 16.71 quintals / acre. Market rate Rs. 2300 per quintal, increased income of village Rs. 1032953.

Crop diversification

1	Maize	54.75	30.38	2200	3659271

Crop diversification: Maize crop replaced the area of summer paddy (5.90 ha) due to less water requirement and more profitable in compare with summer paddy. Farmers also divert on cultivation of mustard and safflower in rabi season. Maize cultivation which used to be taken only on 10.40 hectare, increased to 32.30 hectare. Increased income of village Rs. 3659271.

Social Change in the village

Faced with unprofitable farming and unemployment the villagers, mainly the youth, were migrating to cities in throngs before the village adoption programme was started two years ago. The technological support provided by the KVK scientists gave a confidence and new ardor to them and they are seriously occupied in agriculture. Also, now there is an environment of diversification in agriculture.

TRAINING NEED ANALYSIS OF BHANDARA DISTRICT FARMERS

Training plays an important role in the advancement of human performance in a given situation. KrishiVigyan Kendra, Sakoli conduct a variety of trainings for the benefits of farmers and rural youth in Bhandara district. KVK training programme starts with identification of training needs, the most important steps in organization of any training programme. The present study on training needs analysis of the farmers and rural youths conducted by KVK, Sakoli to identify their training needs and interests during year 2025.

Objectives of the study:-

The objectives of the study were to identify the training need of Bhandara district farmers.

Methodology:-

1) **Selection of Taluka and Villages** - For the study all seven blocks i.e. Bhandara, Sakoli, Mohadi, Tumsar, Lakhani, Lakhandur, Pauni of Bhandara district were selected, total 12 villages based on production potential of the different farming system were selected for the present study.
1) **Selection of farmers as respondents** – On consultation with the extension functionaries of state agricultural department, local leaders as well as KVK staff, a list of farmers representing different categories were selected for each village. From the individual list of farmers from selected village, ten farmer respondents were randomly selected. Thus, a total of 120 farmer respondents will be finally selected for data collection

Collection and analysis of data

The interview schedule was constructed in accordance with the study objectives and it was used for data collection. The respondents were contacted either at farm or home and the information in the interview schedule was collected. The information obtained from 120 farmers was taken for analysis. The information analysis with suitable statistical tools.

The farmers responses were collected in a 3 point continuum scale as Very important (VI), Important (I) and Not Important (NI) by assigning scores3, 2 and 1 respectively. the results were calculated as weighted score for each of the thrust area identified for the training.

$$\text{Weighted score (WS)} = \frac{(\text{No.of VI} \times 3)+(\text{No.of I} \times 2)+(\text{No.of NI} \times 1}{\text{Total no. of VI+I+NI}}$$

Results and discussion

The training needs of the farmers are presented in the form of weighted scores in the tables 1-9. Weighted scores were ranked within each discipline and the ranking were identified as training needs of the farmers of the district.

5.2. Indicate the methodology for identifying OFTs/FLDs

For OFT:

i) PRA
ii) Problem identified from Matrix
iii) Field level observations
iv) Farmer group discussions
v) Others if any

For FLD:

i) New variety/technology
ii) Poor yield at farmers level
iii) Existing cropping system
iv) Others if any

The PRA and other survey methods were implemented in the adopted village and other survey methods like use interview schedules, questionnaire, secondary data, RRA and discussions with farmers group, following conclusions has been drawn:

Adopted Village:

- Papda kh.

For needs assessment of farmers of Papda kh, We had to conduct the PRA, farmers are basically self-conscious in nature and hesitate to meet the strangers and reluctant to furnish the required information. For the purpose, we could have to come closer with the gratefulness of villagers because their involvement for learning the situations and planning was necessary. We identified some key informants who have some education, worried for the backwardness of their people and interested to play the role in socioeconomics development of their people. Through these key informants we had frequently visited to other villagers and developed rapport with them. In this way we had rapport with the farmers of Papda kh. and involved them in the process of learning situation. For learning the situation and action, we used various PRA techniques / tools which are discussed as follows.

a) Survey methods used (survey by questionnaire, PRA, RRA, etc.)

- PRA
- RRA
- Personal Interview method
- Data from secondary sources
- Official websites of the Government line departments

POIN Analysis:

The PRA and other survey methods were implemented in the Papda kh. village and other survey methods like use interview schedules, questionnaire, secondary data, RRA and discussions with farmers' core group, following POIN analysis has been drawn:

Sr	Problems	Opportunities	Issues	Needs
1	Monocropping	Introduction of New crop, diversified cropping system	Lowyield,low productivity, Unawareness about cropping system	Training Demonstration Exposure visit
2	Lack of Knowledge about scientific technology about crop production	Upliftment of scientific Technology	Use of local varieties, traditional farming system, no proper tillage operation	Training Demonstration Popular articles

SWOT analysis of PapdaKhurd village: (S- Strength, W- Weaknesses, O- Opportunity, T- Threats)

Strength:

1. Availability of organic waste
2. Greater participation of farmers in social activity
3. Positive attitude towards livestock business
4. Soil best suited for agronomical and horticultural crops
5. Rural Youth population is more

Weaknesses:

1. Monoculture cropping pattern of village.
2. Use of local varieties
3. Less knowledge about IPM, INM.
4. Less use of bio fertilizers and seed treatment.
5. Imbalanced fertilizer and pesticides use
6. Lack of irrigation water
7. Lack of scientific knowledge about care and management of livestock
8. Lack of Knowledge & availability about farm machinery/ Implement
9. Less risk bearing ability
10. Reluctant to new technologies

Opportunities:

1. Scope for enhancing diversified farming system approach.
2. Use of high yielding varieties.
3. Scope for increasing area under pulses, oilseeds and vegetables crops.
4. Create awareness about balanced use of fertilizer and pesticides.
5. Introduction of crossbred animals and improved fodder crop variety.
6. Scope for increasing milk production and poultry.
7. Use of improved Implements for Enhancing work efficiency and saving cost.
8. Scope for developing agro base enterprises, value addition.
9. Scope for entreprunship development.

Threats:

1. Heavy losses due to wild animals.
2. Uncertainty and long dry spell of rainfall.
3. Unavailability of post-harvest technologies viz. storage facility etc.
4. Discontinuity in electricity.
5. Status of ground water table is low

5.3. Field activities

2	In Chickpea yield was obtained more when sowing done by recommended spacing than broadcasting method
3	Rice varieties recommended for the district yields more, yield increases due to application of fertilizers on soil test basis
4	Due to use of Use of improved variety of Chickpea PDKV,Kanchan ,seed treatment and insecticide yields were higher
5	Use of Improved variety of Linseed NL-260 with Seed treatment give more yield than FP.

10.2. Technical Feedback from the KVK Scientists (Subject wise) to the research institutions/universities:

S. No	Feed Back
1	Incidence of pests was found minimum in recommended technology when applied at ETL than farmer practice
2	use of improved variety gave higher yield than local varieties
3	Rice varieties recommended for the district yields more, yield increases due to application of fertilizers on soil test basis
4	Due to use of Use of improved variety PDKV,Kanchan,seed treatment and insecticide yields were higher
5	NL- 260 yields more
6	Yield of Redgram is more in dibbling on beds as compare to paddy bunds.

1. Extension Research (2025)

Title: Impact of Front Line Demonstrations (FLDs) on PDKV Tilak

Krishi Vigyan Kendra, Bhandara is playing important role in popularizing improved technologies. KVK conducted frontline demonstrations of Paddy (PDKV Tilak). FLDs are demonstrated on farmer's field and on their farming situation. The FLDs conducted on farmer's field are closely monitored by the KVK scientists. KVK arranged different extension activities like field day and group discussion to visualize the result of FLD over conventional method. To find out impact of the PDKV Tilak FLDs demonstrated by KVK on its beneficiaries, this study was conducted in bhandara district

Objectives of the study:-

The objectives of the study were 1) To study impact of the FLDs demonstrated by KVK, Sakoli on its beneficiaries.

Methodology:-

2) **Research design used for the study: -** The Ex-post facto research of the social research was used in the present study as it aimed to ascertaining the impact of the FLDs on the paddy grower.
3) **Locale of study**: - Present study was conducted in the villages of Bhandara district where Front Line Demonstration on paddy were organised by Krishi Vigyan Kendra, Sakoli (Bhandara) of the Vidarbha region of the Maharashtra state.
4) **Selection of Taluka and Villages** – KVK, Sakoli had been conducted 45 demonstrations on Paddy in Kharif season in last 3 years at Sakoli block of Bhandara district. In Sakoli block, Papda kh, Parastoal and Umri selected for study where the Front Line Demonstration on paddy were conducted.
5) **Selection of farmers as respondents** – A list of farmers in selected villages was obtained where the FLDs on paddy were conducted KVK, Sakoli. All 45 FLDs beneficiary were selected for the study.

Variables and their measurement

1) Technological gap (Yield gap I)= potential yield – demonstration plot yield
2) Extension gap (Yield gap II)= demonstration yield– actual yield (farmers practice)
3) Total yield gap = potential yield – actual yield
4) Technology index **(%)** = technology gap/potential yield X 100

Results and discussion

Table1. Impact of FLDs on Extension, Technology gap and yield index of PDKV Tilak

Year	Area (ha)	No.of Demos	Yield (kg/ha)			% increase in yield	Extension gap (kg/ha)	Technology gap (kg/ha)	Technology index (%)
			Potential yield	Demonstration yield	Farmers yield				
2022-23	6.00	15	5500	3780	2810	34.51	970	1720	31.27
2023-24	6.00	15	5500	4167	3240	28.61	927	1333	24.23
2024-25	6.00	15	5500	4335	3428	26.45	907	1165	21.18
Pooled data	**-**	**-**	**5500**	**4094**	**3159**	**29.85**	**934**	**1406**	**25.56**

Yield parameters: The perusal of data indicate that rice average yield 4094 kg/ha was obtained under demonstration plots as compared to farmers practice plots yield 3159 kg/ha consecutively. These results clearly indicate that the higher average yield was obtained in demonstration plots over the years compared to farmers practice due to adoption of scientific recommended package of practices in paddy cultivation.

Extension gap: on an average extension gap under three year FLDs programme was 934 kg/ha. This emphasis the need to educate the farmers through various techniques for the adoption of improved agricultural production technologies for the adoption of scientific recommended package of practices in paddy cultivation.

Technology gap: The average technology gap recorded as 1406 kg/ha. Hence location specific technologies/recommendation are necessary to bridge these gaps.

Technology Index: The average technology index recorded as 25.56 per cent which shows the effectiveness of technical interventions.

***Title*: Impact of Beekeeping skill training programmes organized by KVK, Sakoli (2025-26)**

***Introduction*:-**

Training is one of the important aspects of human resource development. A study on Impact of major training programmes organized by KVK, Sakoli throughout the year (2025-26) in Bhandara district farmers. KVK, Sakoli conducted 30 farmers (RY) skill training programmes on Beekeeping under *National Bee and honey mission* (NBHM), under the sponsorship of District Superidentent Agriculture officer (DSAO) Bhandara, throughout the year 2025-26. It is essential that KVK be able to follow the results of their efforts and understand how the training they imported fit into the complex pattern of socio economic status change in which all farmers participate. Keeping the above facts in view the present study was designed with following specific objectives

1) To study training effectiveness.
2) To Study the impact of training.

Methodology:-

1) **Research design used for the study: -** The Experimental research design of the social research was used in the present study as it aimed to ascertaining the Impact of major training programmes organized by KVK, Sakoli throughout the year (2025-26).

2) **Selection of respondents** –Major training programme conducted by KVK, Sakoli was selected for the study for the study. Total trainees present in the training were selected as respondents. Thus Beekeeping Skill 30 trainees were selected for present study.

Results and discussion:-

1) **Beekeeping skill training under *National Bee and honey mission* (NBHM) programme.**

Table 1. Comparative mean scores of pre training and post training knowledge of Beekeeping skill trainee's respondents

S.No	Aspects of Beekeeping skill training under NBHM programme.	Pre training (mean)	Post training (mean)	Difference
1	Different types of species of honeybee	1.30	2.93	1.63
2	Selection of suitable domestic honeybee	1.17	2.87	1.70
3	Natural habitat for honeybee	1.33	2.83	1.50
4	Life cycle of honeybee	1.23	2.80	1.57
5	Social life of honeybee	1.17	2.83	1.66
6	Division of honeybee colony	1.23	2.83	1.60
7	Different instruments used for honeybee rearing	1.30	2.93	1.63
8	Care taken during handling of honeybee	1.17	2.90	1.73
9	Regular Monitoring of honeybee colony	1.10	2.87	1.77
10	Curative measures undertaken after bites	1.23	2.87	1.64
11	Scientific way to collect pure honey	1.07	2.90	1.83
12	Collection technology of pollens & wax	1.07	2.90	1.83
13	Artificial feeding & management in all seasons	1.13	2.87	1.74
14	Use of honey extraction machine	1.27	2.73	1.46
15	Precautions during migration of honeybee colony	1.07	2.87	1.80
16	Food required for honeybee rearing	1.23	2.97	1.74
17	Different pests, diseases & their management	1.30	2.87	1.57
18	Usefulness of honeybees for pollination in crops	1.20	2.87	1.67
19	Value addition and commercial honeybee rearing	1.13	2.80	1.67
20	Different Govt. schemes for beekeeping	1.17	2.73	1.56
21	Economics of beekeeping	1.03	2.77	1.74
22	Benefits of honeybee rearing	1.23	2.90	1.67

In order to ascertain the impact of beekeeping training programme on gain in knowledge, the pre and post mean knowledge scores of the recipients of the training was calculated and difference are presented in table 1. Difference between pre and post mean knowledge scores of the recipients of the training confirms that the respondents were able to gain sufficient knowledge at post training programme.

Table 2. Change in knowledge in Beekeeping training respondents

Sr.No	Impact dimension	Mean		Percent change
		Pre training	Post training	
1	Knowledge	26.13	62.84	140.48

The data depicted in table 2 show the change in knowledge in beekeeping training respondents, pre training mean score was 26.13 and post training mean score was 62.84 observed, percent change in knowledge was observed 140.48.

Table 3. Reasons for participation in on-campus in Beekeeping training

Sr.No	Reasons	Number of trainee	Percentage
1	To conserve indigenous bees	03	10.00
2	To improve pollination in field & fruit crops	14	46.67
3	To adopt beekeeping as entrepreneur	07	23.34
4	To improve skills and knowledge	02	06.66
5	Production of honeybee and wax	04	13.33

The data depicted in table 3 show the reasons of the participations in on campus training on beekeeping, results reveals that 46.67 per cent respondents joined the training to improve pollination in field & fruit crops of this district followed by adopt beekeeping as entrepreneur (23.34%).

Table 4. Perception of trainees regarding importance of adopting beekeeping entrepreneur

Sr.No	Particular	Perception (%)
1	Importance of honey bees in pollination	70.00
2	Honey production	26.66
3	Bee products	03.34

It was evident (Table 4) that 70.00 per cent trainees gained knowledge on the importance of bees for pollination of crops and conservation whereas 26.66 per cent participants were interested in honey production and its sale. Only 3.34 per cent participants were interested in other bee products like wax, pollen etc.

Table 5. Training effectiveness of Beekeeping training

Sr. No	Indicators	Total obtainable mean score	Obtained mean score	Training effectiveness
1	Topics covered	3	2.76	92.00
2	Utility of topics	3	2.78	92.67
3	Relevance of lectures	3	2.74	91.33
4	Fulfillment of expectation	3	2.71	90.33
5	Practical Orientation	3	2.77	92.33
6	Relevance of study material	3	2.75	91.67
7	Quality of training	3	2.74	91.33
	Total	**21**	**19.25**	**91.67**

It could be observed from table 3 that out of seven major dimensions taken for the study, the effectiveness score for utility of topics and Practical Orientation was found to be the highest (92.67% & 92.33%) followed by Topics Covered (92.00%), Fulfillment of expectation (90.33%) and Relevance of study material (91.67%), Quality of training (91.33%) and Relevance of lectures (91.33%). Overall training effectiveness score of the beekeeping training programme worked out to be 91.67 which indicated that the KVK training can be considered to be effective with respect to the dimensions under study.
